

Thyroid extract capsules produced by Klösterl-Pharmacy

In the field of holistic thyroid therapy, the therapeutic use of natural thyroid extracts is getting more and more important.

An updated monography for the natural raw material “Thyroid” has been adopted in the United States Pharmacopeia (USP) with comprehensive requirements on quality and purity. In observational studies, this natural raw material has gained approval worldwide, with optimal patient tolerance and best therapeutic results.

We have acquired long-term experience in the processing of natural thyroid extracts, and since July 2016 we have produced our capsules “**Thyreogland**” with the active ingredient according to USP 37.

This raw material contains the thyroid hormones levothyroxine (T_4) and liothyronine (T_3) at the ratio $T_4 : T_3 = \text{ca. } 4 : 1$. As filler we use rice starch.

Thyreogland is in stock in the following dosages (according to the natural content of levothyroxine in mcg):
5 / 10 / 15 / 20 / 25 / 30 / 40 / 50 / 60 / 70 / 75 / 80 / 90 / 100

A prescription should contain the complete formulation.

For example: **Thyreogland 50**

Extr. gland. thyreoideae sicc. with 50 mcg T_4 , Rice starch (filler); m. f. caps. Nr. 50/ 100

It is important to specify the amount of capsules (the packaging sizes are bottles with 50 or 100 capsules) in addition to the strength (amount of T_4), so that we can provide the medicine. Klösterl-Pharmacy has to receive the medical prescription in original, that means by normal mail (post). E-mail or fax is not sufficient.

If necessary, the therapy can be adjusted with free T_4 according to the individual patient’s needs, for example with our liquid formulation “Thyroxin (T_4) Tropfen” or our hypoallergenic capsules “Levothyroxin-Kapseln”.

All up-to-date information can be found on www.infoportal-kloesterl.de.

We are looking forward to a good cooperation.

Kind regards

Klösterl-Pharmacy Munich
